

# GRAPHITE CHAIN FLUID

## (Bakery Chain Lubricant)

**GRAPHITE CHAIN FLUID** is a water-based graphite-dispersion intended for use in bakeries or other high temperature ovens where smokeless chain lubricant is needed. At high temperatures the water will evaporate leaving behind a soft, slippery, protective graphite film.

Its recommended shelf life is one year. Extended storage may lead to graphite concentrating toward the bottom of the container.

### APPLICATIONS:

- Bakery chains or open gears
- High temperature chains
- Lightly loaded open gears

This product may be used as a cutback with up to 5 parts tap water (5:1) or used neat. It may be applied as a spray or by brush or paddle. Spraying will leave a more uniform film on the parts.

### TYPICAL CHARACTERISTICS

Product Code	17147
Specific Gravity @ 60°F (lbs/gal)	1.08 (9.0)
Color (visual)	Black
Viscosity, cps @ 40 C	100-500
Carrier Fluid	Water
Freezing point	32 F
Solids Content, wt%	18
