

ALTIS MV NA GREASE

GREASE

Multi-purpose, polyurea grease

APPLICATIONS

**Adhesive,
multi-purpose,
extreme pressure
industrial & automotive
grease**

- **ALTIS MV NA GREASES** are shear-stable multipurpose greases with low bleeding tendencies. They are formulated to maintain its consistency under operating conditions. This prevents grease from running out of bearings due to shear softening.
- **ALTIS MV NA GREASES** are special synergistic additive blends with excellent EP that is retained, even after high temperature soaking, unlike most multipurpose greases which contain sulfur as an EP additive. Furthermore they retain an ability to resist wear, even under shock loading conditions. It is non-staining to yellow metals, even at high temperatures. They have is proven to be an excellent lubricant for moderate to high temperature applications, especially in industrial applications where high temperatures are encountered. They are recommended for sealed-for-life bearings, rolling element bearings and automotive constant velocity joints.

SPECIFICATIONS

- ISO 6743-9: L-XBDB-1 and L-XBDB-2
- DIN 51502: KPF1P-25 and KPF2P-20

ADVANTAGES

**High temperature
low-ash grease**

- Meets a wide variety of requirements and applications.
- Retain excellent EP properties even at high temperatures.
- Durable and resistant to water, pollution, and temperature variations.
- Non-staining, low ash grease
- Low bleeding tendency and easy to centrally dispense
- Excellent anti-rust, anti-corrosion and anti-oxidation properties.

TYPICAL CHARACTERISTICS ALTIS MV NA GREASES

NLGI Grade	1	2
Appearance, Visual	Smooth milky blue grease	Smooth milky blue grease
Thickener type	Polyurea	Polyurea
Penetration worked, 60x ASTM D 217	325	280
Dropping point, °F (°C) ASTM D 2265	520 (271)	520 (271)
4 Ball EP Weld load, kg. ASTM D 2596	620	620
Load wear index	78	78
Timken OK load, lbs ASTM D-2509	60	60
Base oil viscosity @ 40°C, cSt ASTM D 445	150	150
Approximate temperature range °F	-10 to 275	0 to 275
