

Electrical Contact & Brake Cleaner

SafeGard® Spray

Electrical Contact and Brake Cleaner is a quick working, fast drying, non-corrosive cleaner that dries without any residual oil film. It is the most requested item at electronics manufacturers, tool rooms, and is used extensively at vehicle service departments for surface cleaning of engine parts, carburetors, brake pads and rotors, suspension assemblies, gear boxes, sparkplugs, tools, shop equipment and electrical contacts.

The **SafeGard Spray System** is environmentally friendly because it uses no ozone depleting propellants. The lubricant is contained inside a bladder in the can. Air pressure between the can wall and the bladder provides the pressure to atomize the fluid allowing the spray in any direction even upside down.

Applications

Spray liberally for good surface coverage to dissolve and flush away contaminants such as: grease, oil, carbon deposits, dirt and grime. Allow equipment to dry before operating, assembly or painting. Helps to clean and prevent failure of ignition and electrical contacts. Remove heavy deposits with cloth or brush while applying intermittent spray of Electrical Contact & Brake Cleaner. Use extension tube to concentrate spray in tight areas.

CAUTION: Fluid is flammable. Do not use near open flames.

Benefits

- Clear, Colorless Liquid.
- Cleans and Degreases All Metal Surfaces.
- Application include: Electrical, Manufacturing, Tool & Die Shops, Marine, Snowmobile, Automotive, Bicycle, Hobby, Competition Vehicles and Support Equipment.
- Leaves No Residue.
- Fast Drying, Non-Staining Petroleum Solvent.
- Displaces Moisture.
- Harmless to Most Plastics.
