PRODUCT NEWS
E-Mail Edition
JANUARY 2007

LUBRICANTS USA is proud to announce the introduction of three new products:

FINA Kappa Premium 15W-40
FINA Kappa SL 15W-40
FINA Soluble Oil XD

Diesel Engine Oils

Kappa Premium and **Kappa SL 15W-40** are new heavy-duty diesel engine oils that meet API CJ-4 requirements. The two products meet Detroit Diesel 93K218 and Cummins CES 20081.

FINA **Kappa Premium** 15W-40 is our newest top-tier oil. It meets all OEM credentials associated with API CJ-4/SM. The key credential it meets is Mack EO-O Premium Plus 07 and the automotive API category SM. **Kappa Premium** has a base number of 10.1.

FINA **Kappa SL** 15W-40 meets all API CJ-4 requirements and OEM credentials associated with CJ-4 except for API automotive category SM that is required by Mack for its 2007 engines. It has a slightly lower total base number (9.6) than **Kappa Premium**. It is highly recommended for users who do not have 2007 Mack diesel engines. **Kappa SL** is more cost-effective than **Kappa Premium**.

All other FINA-branded heavy-duty diesel engine oils (Kappa DHD, Universal Plus XL, Universal Plus and Fleet) will continue to be offered.

New Soluble Oil

FINA Soluble Oil XD is an improved soluble oil containing biocide. It has a higher effectiveness in killing bugs and yeast than Soluble Oil 294 or Soluble 294-B. It has a lower odor and improved emulsion stability than Soluble Oil 294-B. Hence it is recommended for use in hard water.

If you would like additional information on either product line, you may obtain product data sheets and MSDS at our web site (www.FinaLube.com) or you may contact Alan Denniston by e-mail at Alan.Denniston@FinaLube.com, or by phone at 469-241-0950 extension 16.
