# HEAVY DUTY ENGINE OILS

**SUPERIOR PROTECTION, PERFORMANCE  
AND COMPELLING COST SAVINGS**

## FINA Kappa DHD 15W-40

Kappa DHD 15W-40 provides "The Ultimate" heavy-duty diesel engine protection. It is a superior quality 12 TBN engine oil designed to meet or exceed the most stringent requirements of modern high output diesel engines and is specially formulated for exhaust gas recirculation (EGR) or severe duty diesel engines.

Kappa DHD engine oils are formulated to enable extended drain intervals for virtually all engines without sludge and varnish buildup. Advanced soot dispersancy and high detergency levels effectively protect bearings and other engine surfaces from corrosion and wear. Outstanding low temperature flow minimizes engine wear at cold start-up when engines are most susceptible to damage.

Shell Rotella T, Chevron Delo 400 and Mobil Delvac 1300 Super are excellent products. Kappa DHD's quality positions it in this same product group. We invite you, however, to compare product prices. We believe you'll be as impressed with the cost savings of using Kappa DHD as you are with Kappa DHD's performance.

## FINA Universal Plus XL 15W-40

Universal Plus XL 15W-40 is a high-performance, heavy-duty engine oil that provides excellent diesel engine performance. It is a 10 TBN fleet engine oil designed to meet the API Engine Service Classification of CI-4 Plus for heavy-duty diesel engines, as well as API SL for gasoline engines.

Universal Plus XL is blended with a balanced package of detergents and dispersants, and specially selected anti-wear additives to control ring belt deposit formation, minimize wear, disperse soot and control varnish. It's recommended for modern diesel engines with exhaust gas recirculation (EGR) systems requiring an SAE 15W-40 engine oil.

If you're currently using Shell Rimula Premium or Chevron RPM, give Universal Plus XL a test drive... you'll be pleased with its outstanding performance and its compelling economics.

## FINA Universal Plus Engine Oils

Universal Plus Engine Oils are premium quality oils blended from highly refined paraffinic mineral oils and specially selected additives. These 10 TBN engine oils help low emission engines maintain power while reducing deposits, especially in critical piston ring grooves.

Universal Plus is truly a multi-purpose engine oil, an excellent application for fleets with varying types of equipment. Suitable for nearly all engines and most truck transmissions as well, Universal Plus engine oils allow fleet operators to satisfy warranty and operating requirements while maintaining the least number of lubricants in inventory.
